

1978

2008

**IT WAS WRONG THEN,
IT IS WRONG NOW**

actnowforhealth.org

Thirty years ago governments signed the Alma Ata Declaration promising health for all by 2000. Clearly we are still not there.

In 2008, Alma Ata remains as important as it was in 1978. The principles of equity and health for all are critical to deliver the Millennium Development Goals.

Each year:

- nearly 3 million people die of AIDS-related causes
- half a million women die in childbirth and pregnancy
- almost 10 million children die before their fifth birthday

Now is the time for governments to reaffirm their commitments to health for all and redouble their efforts to meet the MDGs.
